

Protect All

Keeping all the surfaces of your boat cleaned, waxed, or polished should become a lot easier—about as simple as it gets—with this product. Protect All is a spray-on, wipe-dry liquid, and is effective on glass, stainless steel, paint, wood, vinyl, rubber, and plastic.

First made popular in the RV, aircraft, and motorcycle industries, Protect All is now attracting the attention of boaters. Because it works on almost any surface, it eliminates the need to buy numerous different products—nice if you're traveling from place to place.

But its UV protection and water-repellency are its main benefits for marine use. On all surfaces, Protect All will help fend off the damaging effects of ultra-violet rays, which cause colors to fade and materials to deteriorate. On hard surfaces, it works like a wax to bead off water.

Protect All is available primarily in 16- and 32-ounce, non-aerosol spray pump bottles. It also comes in aerosol spray cans. The 16-ounce bottle should clean a small boat about five times. For refills, you can get a one-gallon jug.
