

RV Today - September 1993

By Tom Glenn

Clean and Polish

...Protect All is...the most amazing product I've ever used, and the longer I've used it the more uses I've found for it. Primarily it's a polish for the exterior of your RV—but it has other uses.

Protect All is not a cleaner; it will not remove road tar, grease, or oxidation. You must have the surface clean and oxidation-free. Now you're ready for Protect All. Wipe it on and wipe it off—that's all there is to it, but use sparingly—it goes a long way. Your RV will now not just shine but glisten. Repeated applications offer greater protection and it's the easiest polish to apply I've ever used.

Another use is on your aluminum awning bars. There are many more uses for it both inside and outside of your RV, but don't put it on entry steps, grab handles or shower seats or floor, or any floor surface. It leaves a very slick surface and could cause a fall in these applications. But that slick surface makes it great for sliding window channels, door latches, key holes, and door locks...
