“Protect All” Cleaner

Tired of using your weekend to clean your Venture? Or too tired after a long trip to wash it down? Tired of hauling out cans of gunk, chrome polish, cleaning and waxing compounds? Now available is an all-purpose cleaner/polish called Protect All, which can make the chore of cleaning your Venture quick and easy. This is especially welcome after a long trip; by the time your riding partner has the gear put away, you can have your Venture sparkling clean.

Protect All is easy to use. If your bike is very dirty, it does help to wash it first. Otherwise, just spray it on and wipe it off, then buff with a clean cloth. Your Venture is clean and the surfaces are protected by the chemical compounds in the polish.

After you clean your Venture the first time, the dust is easily wiped off. Mud and dirt can be hosed off and wiped dry, leaving a like-new look.

Venture owners have used Protect All on their Ventures, cars, even kitchen cabinets and appliances. It's quick and easy to use, though water spots do require a little rubbing, as do bugs on the windshield. One caution: catch the overspray on the floor with newspaper; it's slippery. Also, don't use it on the top of the motorcycle seat because it is slick and you'll slide around too much.

Protect All is recommended for use on any surface with the exception of glass or unlacquered leather. It cleans and treats vinyl and rubber, waxes paint and polishes chrome.

A single spray can of Protect All can replace several other cans of cleaners and polishes on your garage shelves. This product seems to be quite long lasting and economical to use. One member has cleaned his Venture four times, and a car and a kitchen once each.
